

A year with VST Enterprises

Louis-James Davis, CEO of VST Enterprises:

"In 2016, we've come an incredibly long way in such a short amount of time. I believe this is due to the growing need for a solution like VCode in the market. We're delighted to have taken leaps towards offering our scannable, secure image technology to a global and varied customer base."

Theresa May, Prime Minister of the United Kingdom:

"I know VSTE prides itself on its 'infinite possibilities' – and it is exactly that sort of optimism this country needs to power its economy. Manchester's exciting tech industry is already sparking new ideas and new businesses and VSTE will be able to spread the word in India."

Liam Fox, International Trade Secretary:

"VST Enterprises is a prime example of how UK firms are seizing the numerous opportunities available in overseas markets. It's great to see VST Enterprises follow the Prime Minister's Trade Mission to India with a new contract which will use the best of British innovation to deliver huge benefits for India and for the UK."

Claire McLoughlin - Head of Interactive Technology, BBC:

"The BBC is proud to support a UK company which is pushing the boundaries and can see the benefit of using VCodes for a wide range of campaigns."
